

## No Land Line—No Problem!

### We use the Aura Wireless Bluetooth Conferencing System by Spracht

We are completely wireless at The Office Sandpoint so when we tell you we don't have a land line, don't panic. We offer an excellent conferencing system for our meeting clients that works with Bluetooth enabled phones and a headphone jack if your phone is not a smart phone. The system has excellent sound quality with noise-reduction and echo-cancellation features.

Please let us know if you have any questions about our wireless conferencing system.
